PRIVACY-ENHANCED ONTOLOGIES

TODO: CHOOSE SUBTITLE

DIOGO HENRIQUE SILVESTRE MATOS CEBOLA

BSc in ⟨Computer Science⟩

Advisers: Matthias Knorr

Auxiliar Professor, NOVA University Lisbon

João Leitão

Auxiliar Professor, NOVA University Lisbon

Henrique Domingos

Associate Professor, NOVA University Lisbon

ABSTRACT

1. What is the problem?
2. Why is this problem interesting/challenging?
3. What is the proposed approach/solution?
4. What results (implications/consequences) from the solution?

Keywords: Keyword 1, Keyword 2, Keyword 3, Keyword 4

RESUMO

1. Qual é o problema?
2. Porque é que é um problema interessante/desafiante?
3. Qual é a proposta de abordagem/solução?
4. Quais são as consequências/resultados da solução proposta?

Palavras-chave: Palavra-chave 1, Palavra-chave 2, Palavra-chave 3, ...

CONTENTS

1	Introduction	1
1.1	Context	1
1.2	Problem	1
1.3	Proposed Solution	1
1.4	Document Organization	2
2	State of the Art	3
3	Work Plan	4

TODO LIST

■ <i>TODO</i> : Explain the motivation for the Semantic Web and use of ontologies.	1
■ <i>TODO</i> : Enumerate industry/investigation examples.	1
■ <i>TODO</i> : Mention cloud and external computing, general adoption growth...	1
■ <i>TODO</i> : Explain tools and workflow used in ontology engineering.	1
■ <i>TODO</i> : Contrast the usefulness with the limitation/security problems of cloud/remote computing	1
■ <i>TODO</i> : Explain why some ontologies need privacy mechanisms. Define the mechanisms needed.	1
■ 1) [Diogo] : Should scope be the word used?	1
■ 3) [Diogo] : Mentioned is worse than referred.	1

INTRODUCTION

1.1 Context

1. Briefly contextualize the Semantic Web. Why are ontologies relevant?

TODO: Explain the motivation for the Semantic Web and use of ontologies.

2. State of adoption. How/where are ontologies being used?

TODO: Enumerate industry/investigation examples.

3. Future expectations. How will the technology evolve?

TODO: Mention cloud and external computing, general adoption growth...

1.2 Problem

1. How is the current state of ontology development/engineering?

TODO: Explain tools and workflow used in ontology engineering.

2. Why remote computation is gaining adoption in the area, but what are current limitations/problems unresolved?

TODO: Contrast the usefulness with the limitation/security problems of cloud/remote computing

3. Why is there need for privacy in ontologies?

TODO: Explain why some ontologies need privacy mechanisms. Define the mechanisms needed.

1.3 Proposed Solution

Briefly explain proposed solution. The **scope**¹ of the solution, **contributions**², and how will it solve the problems **mentioned in previous section** **referred in the previous section**³.

1) [Diogo]: Should scope be the word used?

2) [Diogo]: Comment test

3) [Diogo]: Mentioned is worse than referred.

1.4 Document Organization

Specify the document organization, per chapter.
